PRINCESS AMA BOATEMAA

UI/UX Designer | HCI & Human-Centered AI Research Enthusiast

Accra, Ghana | +233 535 570 100 | princessboat14bla2@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Computer Science undergraduate at Ghana Communication Technology University, specializing in UI/UX design and human-computer interaction. Practical experience in user interviews, persona development, competitive analysis, wireframing, and prototyping through academic, professional, and hackathon projects. Interested in Human-Centered AI, Explainable AI, and intelligent user interfaces, particularly how transparent AI systems can support informed design decisions and improve people's interactions with technology. Brings a foundational understanding of frontend development to the design process.

DESIGN & UX SKILLS

Design & Prototyping: Figma, Wireframing, Prototyping, Design Systems

Tools: Figma, Adobe XD, Lucidchart, Surveymonkey, Usability Hub.

Research Methods: User Research, Usability Testing, Competitive Analysis, User Interviews, Personas

Practice: Design Thinking, Human-Computer Interaction (HCI), Accessibility & Inclusive Design

Technical Foundation: HTML5, CSS3, JavaScript, React, TypeScript, Git/GitHub

Research & Interests: Human-Computer Interaction, Human-Centered AI, Explainable AI, Intelligent User Interfaces, Interactive Media

EDUCATION

BSc in Computer Science - Specialization: UI/UX Design *Jan 2024 – Nov 2027 (Expected)*
Ghana Communication Technology University (GCTU)

- Relevant coursework: Human-Computer Interaction, Software Engineering, Research Methods, Web Development, Data Structures & Algorithms
- Member, Association of Computing Students, participates in coding challenges and hackathons

High School - General Science *Mar 2021 – Sep 2023*
St. Mary's Senior High School

- Captain, National Science and Maths Quiz Competition (NSMQ) team.
- Relevant coursework: Pure Science[(Core subjects: English, Core Maths, Social Studies and Integrated Science) and (Elective subjects: Physics, Biology, Chemistry and Elective Maths)]

ACADEMIC RESEARCH

Explainable AI for Human-Centered Design Decision Support
Proposed Research

- Investigating how Explainable AI can support interface designers by making AI-generated recommendations more transparent and interpretable
- Research spans Human–Computer Interaction, Design Thinking, and Intelligent Decision Support Systems

UX RESEARCH & DESIGN PROJECTS

MoMo Budget - Personal Finance Tracker for Mobile Money Users
Personal Project

- Conducted user interviews, built personas, and ran a competitive audit of 5 comparable apps to define budgeting workflows for first-time Mobile Money users
- Designed and prototyped the core budgeting flows, then translated the final designs into a functional web prototype using React, TypeScript, Tailwind CSS, and Vite

- Deployed live at momo-saver-gh-main.vercel.app; source on GitHub (MrsAmaSanders/momo-saver-gh)

Verdis - Climate-Smart Farm Management Platform
Community Project

- Conducted user research and stakeholder interviews with members of a farmers' association to understand farmers' challenges, needs, and requirements for a climate-smart farm management platform.
- Synthesized stakeholder insights to inform the platform's user flows and interface design, with consideration for accessibility in low-connectivity environments.
- Explored design considerations including offline access, localization, and simplified digital workflows to support practical use in agricultural contexts.

Campus Navigational System
Academic Project

- Conducted user research and interviews with GCTU students to understand common campus navigation challenges and information needs.
- Translated student insights into user flows and a responsive navigation interface designed to support campus wayfinding.
- Integrated real-time location/API data into the prototype and deployed the system through GitHub Pages.

School Management System
Startup Project

- Assisted with UI/UX research to understand the needs and workflows of primary and elementary school users.
- Contributed to user flow development, interface design, and UX decisions for the school management platform.
- Collaborated with the software team to translate user and stakeholder needs into practical digital experiences.
- Contributed to a platform adopted by four schools, including my alma mater.

HACKATHON EXPERIENCE

Team Lead & UI/UX Designer — Team MobiFin
HACK54 Fintech Hackathon, Forms Capital | Aug 17–19, 2026 | Accra, Ghana

- Led a 3-member team to 1st place in a 3-day fintech hackathon organized by HACK54 and powered by Forms Capital
- Owned UX research, information architecture, user flows, wireframes, and interface design for Mobifin AI, an AI-powered mobile money agent platform combining agent cash/e-float management and forecasting with alternative credit intelligence for unbanked customers
- Collaborated with the technical workstream to translate designs into a functional prototype, while directing team strategy and delivery under tight time constraints

UI/UX Designer — Team StockAgent
One Vector Africa AI Week | Sep 4-5, 2026 | Accra, Ghana

- Partnered with the founder of StockAgent AI to represent the team in a 2-member format, while collaborating with CFA-certified financial advisors behind the solution.
- Designed and managed delivery of StockAgent AI, a platform tailored for financial analysts in the stock market of Africa, enabling intelligent insights and decision support.
- Directed project management and UI/UX design under strict hackathon constraints, ensuring cohesive execution across design, engineering, and pitching.

Team Lead & UI/UX Designer — Team HackHer
GirlCode Hackathon by Absa Bank, MTN Ghana and Mobile Web Ghana | Sep 11–12, 2026 | Accra, Ghana

- Led a 4-member team to 3rd place building CapitalBridge, a financial-readiness platform for underserved informal workers, micro/small business operators, and women-owned businesses

- Owned UX research and interface design for the platform's readiness score, Evidence Confidence Index, AI-explained gaps, improvement plan, and shareable Financial Passport
- Directed team strategy and pitch delivery, coordinating across teammates covering frontend/backend and AI engineering under tight time constraints

PROFESSIONAL EXPERIENCE

Associate Software Team Member: UI/UX

Zynuh Technology Startup | May 2026- Present | *Accra, Ghana*

- Translate user requirements and UX concepts into consistent, production-ready digital interfaces
- Collaborate with software team members to ensure design decisions are effectively implemented across responsive web applications
- Contribute to frontend implementation using React and TypeScript

IT Assistant Intern

Netis Ghana Limited | Aug 2025 – Oct 2025 | Accra, Ghana

- Supported the development and usability improvement of internal digital tools while gaining exposure to IT operations and network administration

UI/UX & Frontend Intern

Adroit360 Software Company | Feb 2025 – Apr 2025 | Accra, Ghana

- Collaborated with the engineering team to translate interface designs into responsive web experiences
- Contributed to UI improvements across web products using HTML, CSS, JavaScript, and React

CERTIFICATIONS

- Google UX Design Certificate funded via One Million Coders Programme
- Google AI Fundamental Certificate funded via One Million Coders Programme
- AWS Certified Cloud Practitioner funded via AmaliTech
- ALX Founder Academy Certificate
- Absa Bank Readytowork: Introduction to Project management Certificate

LEADERSHIP & PROFESSIONAL ENGAGEMENT

- **Leadership:** Team Leadership, Cross-Functional Collaboration, Hackathon Delivery under Time Constraints
- Community Manager of Global AI Accra
- Co-Founder of Savherna
- Community Member, Ghana UX Forum
- Canva Africa Design Community Member
- Volunteer, Coding ladies Club Ghana
- UN Student Volunteer (remote, Malawi)

AWARDS & HONORS

- 1st Place, HACK54 Fintech Hackathon - Team MobiFin (powered by Forms Capital)
- 6th Place, One Vector Africa AI Week Hackathon - Team StockAgent (powered by Execute Africa Challenge, One Vector Africa and ALX Africa)
- 3rd Place, GirlCode Hackathon - Team HackHer (powered by Absa Bank Ghana, Mobile Web Ghana and MTN Ghana), Sep 2026
- Top 5 Finalist of Face of GCTU Beauty Pagent
- 1st runner Up of Ghana Tertiary Awards, Best Female Student Model
